

POOL Solutions

Concentrated Clarifier

1 OZ. Treats 5,000 Gallons

KEEP OUT OF REACH OF CHILDREN
CAUTION

See First Aid and Additional Precautionary
Statements on Back Panel.

Net Contents 1 Quart

DIRECTIONS

Backwash the pool filter before adding this product.

Add the required amount of the product to a plastic watering can, fill with water, and add to the pool at the point of maximum agitation. Run the pool filter for 8 hours after adding the this product , then vacuum any residue.

For weekly maintenance, add 1 ounce of this product per 5,000 gallons of swimming pool water. For opening the pool or if pool water is extremely turbid, add 2 ounces per 5,000 gallons of water and run the filter longer.

NOTE: Be sure to follow directions. Do not overapply as that may hinder the products effectiveness.

This product represents the latest generation in water clarification. Pool owners will find filters last longer and operate better. It may be applied while pool is in use.

This product is a cationic polymer that will coagulate and floc suspended particles from swimming pool water, while adding no solid residues of its own. The floc that is formed may readily be filtered form the water by conventional filtering systems.

It is not necessary to adjust pH of the swimming pool water before or after using this product. The performance of this product is not affected by chlorine.

PRECAUTIONARY STATEMENTS

CAUTION: May be irritating to the eyes. Avoid contact. Do not take internally.

FIRST AID:

If in Eyes

- Hold eye open and gently rinse with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
