

NOTES TO PHYSICIAN

This product is anticipated to have moderate oral toxicity, minimal irritation, slow absorption and purgative properties. Treatment is removal of exposure followed by symptomatic and supportive care.

STORAGE AND HANDLING

Do not mix this product with other pool chemicals. Always store in the original container with the top sealed in a cool, clean dry place and away from point sources of heat, i.e., radiant heaters or steam pipes. Never store in an open container. Avoid contamination of any kind of the opened product. Product that is exposed to heat or contamination may suddenly decompose and release noxious fumes. In case of fire or decomposition conditions (fuming product) DELUGE with plenty of water to control the decomposition. Carbon dioxide fire extinguishes will have no effect on decomposing the product.

with heavy bathing loads, i.e., up to 3 or 4 times each week.

Apply the required amount of this product evenly throughout the pool with the pump and filter operating. Add the total amount at one time using a clean plastic scoop. Do not use a metal scoop. Contamination from a metal scoop will cause decomposition of this product. Application should be made with no swimmers in the pool. This product contains no chlorine, you only have to wait until the application is dispersed- at least 15 minutes- before re-entering.

FIRST AID STATEMENT:

INHALATION: If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Call a physician.

SKIN CONTACT: In case of contact, immediately wash skin with soap and plenty of water. Wash contaminated clothing before reuse.

EYE CONTACT: In case of contact, immediately flush with plenty of water for at least 15 minutes. Call a physician.

INGESTION: If swallowed, do not induce vomiting. Give large quantities of water. Call a physician immediately. Never give anything by mouth to an unconscious person.

DISPOSAL AND SPILL PROCEDURES:

Product that cannot be used should be dissolved in at least a 10-fold excess of water (on a weight basis) in an open container and disposed via a treatment or other suitable system in accordance with all local, state, and federal environmental laws, regulations, standards, and other requirements. Consult with the appropriate agency prior to disposal. Do not reuse empty container, place in trash collection after thoroughly rinsing with water. do not contaminate food or feed by storage, disposal or cleaning of equipment.

DIRECTIONS FOR USE:

When adding this product for the first time use at the rate of 2 lbs. per 10,000 gallons of pool water to insure "thorough" oxidation. Thereafter for most residential pools with normal bathing loads, treatment should be made once each week at the rate of 1 pound per 10,000 gallons of pool water, more frequently treatments may be required in commercial or public pools
